FULL-STACK SOFTWARE ENGINEER (LARAVEL / PYTHON)

📌 PROFESSIONAL SUMMARY

Full-Stack Software Engineer (B.Sc., 5+ yrs) in Laravel, MySQL, and Python (Flask).

Shipped 15+ apps across legal, e-commerce, and security with full lifecycle ownership.

Strengths: automation, RBAC/Face-ID auth, reporting; noted for measurable efficiency gains.

🔧 CORE SKILLS

- Back-end: PHP 8.x (Laravel, Eloquent, Queues/Schedule), Python (Flask).
- Front-end: React, HTML/CSS/JS, Bootstrap.
- Data: MySQL, Firebase (Firestore/Storage).
- DevOps: Docker, Git/GitHub, CI/CD, Nginx/Apache.
- Practices: REST, MVC, RBAC, Testing (PHPUnit/Pest), Docs/Training.

🏢 WORK EXPERIENCE

Freelance Full-Stack Software Engineer | Self-employed - Remote (01/2020 – Present)

- Architected and delivered 15+ full-stack applications for diverse sectors including Legal, E-commerce, and Security using PHP/Laravel and Python/Flask.
- Managed the end-to-end development lifecycle, from requirements gathering and system design to deployment, documentation, and client training.
- Key achievement: Automated core workflows for a law firm management system, boosting operational efficiency by 30%.

📁 SELECTED PROJECTS

Taj Educational Platform [Live](#) / [GitHub](#) / 📅 (03/2026 – present)

- Architected integrated and secure educational marketplace featuring Moyasar-powered escrow payments, automated revenue distribution (80/20 splits), and teacher onboarding/approval engine.
- Laravel 12 (REST API), Next.js 14 (App Router), TypeScript, FilamentPHP v3, Agora RTC; Arabic (RTL) and Docker. Fully deployed on DigitalOcean VPS, Vercel.

AI-Powered Hireme Platform [Live ↗](#) / [GitHub ↗](#) / (10/2025 – 01/2026)

- Architected a modern hiring platform featuring AI-driven resume parsing via the OpenAI API to automate candidate screening and streamline application workflows.
- Engineered & Deployed a multi-service ecosystem (User App, Admin Backoffice, and Shared Core) on DigitalOcean, utilizing Laravel 12, Tailwind CSS, and Alpine.js.

Passwordless Face-ID Authentication [Live ↗](#) / [GitHub ↗](#) / (07/2025 – 08/2025)

- Engineered a highly secure, passwordless authentication system using Python (Flask) and face_recognition, featuring Liveness Detection (Anti-Spoofing) and a dynamic AI Tolerance Controller a modern Admin UI.
- Deployed to Google Cloud Run (Docker) via GitHub Actions CI/CD, integrated with Firebase for encrypted credential management, audit logging, and automated brute-force lockouts.

Web Application Vulnerability Scanner System [Live ↗](#) / [GitHub ↗](#) / (02/2025 – 04/2025)

- Scanner with crawler, SQLi/XSS checks, real-time updates; generates PDF reports and delivers via email; maintains scan history.
- PHP/MySQL, HTML/CSS/JS (Docker); ERD/UML documented for maintainability.

Law Firm Management System [Live ↗](#) / [GitHub ↗](#) / (10/2024 – 01/2025)

- Laravel + MySQL with RBAC, clients/cases, tasks, appointments & calendar, invoices/taxes & expenses, vendors, settings, and basic reports.
- Bilingual (AR/EN) UI; local deployment during development (Docker).

EDUCATION

B.Sc. in Software Engineering ↗ College of Engineering, Taiz University, Yemen (07/2020)

- **Credential Verification:** Fully authenticated by **Mosadaqa** (Saudi Ministry of Education verification service).
- [Report](#) ↗ No :BC2026909665 (02/2026).
- English Diploma & International License Diploma (ICDL) - British Institute, Ibb (12/2013).

CERTIFICATES

- Udemy-[Laravel 12](#): The Complete Guide - 27.5 hours - (06/2025).
- Udemy - [MERN Stack](#): React, Node.js, Express & MongoDB - (01/2026).
- Dubai Future Foundation - [one Million Prompters](#) - Prompt Engineering – (04/2026).

LANGUAGES

- Arabic: Native.
- English: Very Good.
